## COMPARISON OF JOB PROFILE WITH INDIVIDUAL

The Target Profile ranges are based on an "Ideal individual's" behavioral style preferences or personality: how they make decisions, react under pressure, respond to different environments, and are handling current life events. Comparing the Job Profile ranges with the Individual can help better understand where the individual will most naturally excel, which situations would most likely be challenging, and provide clarity about how best to motivate the individual, if hired.

### Individual's Match With Job Profile

## AREAS OF POTENTIAL FRICTION

### PERSONALITY

SAMPLE may have a difficult time making the decision confidently as the position would call for.

SAMPLE may be overly communicative and not get the attention of managers.

SAMPLE may not be as attentive to achieving end results as she is to making sure projects' processes are handled properly.
